**Price: \$600.00**

## Description

Bear Grylls challenged Luminox to push even further in its quest for sustainability, by utilizing new upcycled plastic material for the case and strap in partnership with #tide Ocean Material. The ecofriendly material provides equal durability and water resistance, both adventure essentials, as CARBONOX™. The Bear Grylls Survival ECO Master Series intricate dial features a chronograph functionality for timing events, underwater or on land with an additional date display at the 6 o'clock. The earthy green dial features black details for easy reading and the Bear Grylls logo. A matching green #tide Ocean Material strap provides a comfortable and flexible fit. As with any Bear Grylls watch, this watch features his signature orange crown.
