## Description

Limited one time run with these materials. Comes with a Metal COA plate. As well as a microfiber cloth.

The all new Combat Troodon Gen III from Microtech Knives is here! Featuring a newly designed handle with an integrated glass breaker and a ceramic ball titanium pocket clip. The new OTF drive system makes these knives the smoothest that Microtech has ever produced. Extremely smooth/easy opening and closing. The new switch now rides on a milled platform, this helps break up pocket lint/debris and reduces friction which increases its reliability and lowers the frequency of cleanings. The handle now has Torx screws to make it easy to disassemble and clean. These models are completely redone and are sure to please!

Blade length: 3.75"
